HARIS AWAN

Artificial Intelligence Student

PROFILE

BS Artificial Intelligence student at the University of Faisalabad (4th Semester), passionate about AI model training and C++ development. Quick learner with a growing GitHub portfolio of machine learning mini-projects and console-based applications.

HOBBIES

Coding
AI Research
Reading Tech Blogs
Gaming

EDUCATION

Bachelor of Science in Artificial Intelligence
The University of Faisalabad
2023 – Present (4th Semester)

PROJECTS

1. Salary Prediction Model

Developed a regression model using machine learning to predict employee salary based on education, experience, and role. Tools used: Python, Pandas, Scikit-learn.

GitHub: [https://github.com/Harisawan115/salary_prediction]

2. Online Cheat Detection System

Created a classification-based AI system to detect cheating behavior in online exams using face and eye tracking with OpenCV and ML algorithms.

GitHub: [https://github.com/Harisawan115/cheat_detection_system]

3. Stock Market Prediction

Designed a time series forecasting model to predict stock prices using historical trends and machine learning models (Random Forest, LSTM).

GitHub: [https://github.com/Harisawan115/stock_market_prediction]

SKILLS

Programming: C++, Python

AI/ML: Model Training, Scikit-learn, Pandas

Tools: Git, VS Code, Jupyter Notebook

Soft Skills: Problem Solving
